

Lawnmower Bedknife Blade

This bedknife blade is made from hardened steel for durability and exceptional cutting performance. It features precision-drilled mounting holes for secure and accurate installation.

Product Overview

Professional Grade Bedknife Blade

This precision-engineered bedknife is designed for optimal grass cutting performance on golf courses and greens. Crafted from high-quality 65Mn spring steel, it ensures durability and consistent cutting results. The blade supports precise cutting heights ranging from 1.6mm to 3.2mm, making it an ideal choice for maintaining professional-grade turf.

Technical Specifications
