

LCD Display Module

This is an LCD display. It is commonly used to show information in electronic devices.

System Overview

Professional Intercom Display Module

This LCD display module is designed for integration into multi-story intercom and security systems. It supports reliable communication between door phones and indoor monitors across various building levels. The module is engineered for compatibility with standard signal transmission cabling, ensuring clear video and audio performance in complex installations.

Supported Cabling Types

SYV75-5, RVVP6X1.0, RVV5X0.5, RVV2X1.0, RVV3X0.3

Technical Specifications

Power Supply Voltage

- DC12V
- DC18V

Compatible System Components

Door Phones • Indoor Monitors • Signal Isolators • Video Amplifiers
