

LCD Display Panel with Light Guide

This LCD display panel utilizes a light guide plate for even light distribution. It ensures uniform brightness and clarity across the display.

Product Overview

High-Performance LCD Display Components

This LCD display panel assembly features an advanced light guide plate (LGP) designed for superior light distribution. Engineered for uniform brightness and high clarity, the system utilizes specialized diffusion sheets to minimize glare and optimize image reproduction. These high-quality components are essential for maintaining consistent visual performance in professional display monitors.

Technical Specifications

Light Management Features

- Light Guide Plate (LGP)
- Diffusion Sheets
- Uniform Light Distribution
- Glare Reduction

Core Functionality

Uniform Brightness • High Clarity • Optimized Light Scattering

Materials

Acrylic, Polycarbonate
