Product Overview

Advanced Automation Control

This LCD display remote control switch is engineered for efficient business automation, providing precise management of up to three independent electrical loads. Featuring a clear, intuitive LCD interface, it allows users to easily monitor status and configure timing settings. The integrated delay function enables automated activation and deactivation, making it an ideal solution for complex environments requiring reliable, timed control of multiple devices.

Key Features

Core Capabilities

- Independent control for 3 separate loads
- Integrated delay function for timed operations
- LCD display for real-time monitoring
- Manual override and parameter setting buttons
- Designed for business automation systems

Interface

LCD Display, Remote Operation, Manual Buttons, Timed Automation

Technical Specifications

Load Capacity

3 channels

Independent Loads

Control Parameters

Function	Description
Interface	LCD Screen
Control Type	Remote & Manual
Automation	Delay Function
Capacity	3 Loads
