

LD160 Bulldozer for Earthmoving

This bulldozer features a powerful power train system and overload protection for the engine. It offers a shorter operation cycle time.

Overview

Robust Earthmoving Performance

The LD160 Bulldozer is a high-performance construction machine engineered for demanding earthmoving and grading operations. Built with a rugged undercarriage and a powerful engine, it delivers superior traction and stability across diverse terrain types. The operator cabin is designed for maximum visibility and comfort, ensuring high efficiency and precision during long working hours.

Performance Metrics

Operating Weight

16000 kg

Operating Weight

Blade Capacity

4.5 m³

Technical Specifications

Key Features

- Enhanced operator cabin visibility
- Rugged undercarriage design
- Durable blade construction
- High-torque engine performance

Machine Type

Bulldozer

Primary Applications

Earthmoving, Grading, Site Preparation
