

Lead-Acid Battery Charger with Multiple Modes

This battery charger is designed for a variety of lead-acid batteries, offering multiple charging modes to accommodate different battery types and capacities. It features an integrated ammeter for real-time monitoring and LED indicators for displaying the charging status.

Overview

Professional Lead-Acid Battery Charger

This robust and reliable battery charger is engineered to support a variety of lead-acid battery types and capacities. Featuring multiple charging modes, it offers versatility for both professional and DIY applications. Integrated safety mechanisms, including overload, short-circuit, and reverse polarity protection, ensure efficient and secure operation.

Technical Specifications

Charging Modes

- Multiple charging modes
- Variable capacity support

Safety Protections

Overload Protection, Short Circuit Protection, Reverse Polarity Protection

Monitoring & Interface

Monitoring Tools

1 Real-time

Integrated Ammeter

Status Indicators

Charging Status LED • Error Alert LED

Design

Design Features

- Durable construction
- Portable design
