

Lead-Free RV Water Pressure Regulator with Gauge

This lead-free RV water pressure regulator protects RV plumbing from high water pressure, preventing leaks and damage. Its integrated gauge allows for monitoring and adjustment of water pressure.

Product Overview

Professional Grade RV Water Protection

This lead-free brass water pressure regulator is designed to protect your RV or travel trailer's plumbing system from high-pressure water sources. With an integrated gauge for precise monitoring and a user-friendly adjustment screw, it ensures your system operates within safe pressure limits. The durable, hot-cast construction provides a reliable, health-conscious solution for all American water connections.
