

LED Barricade Warning Lights for Traffic Control

High-visibility LED barricade lights are designed for construction and traffic control. They feature durable plastic housings, bright LED illumination, and various mounting options for marking hazards and directing traffic.

Product Overview

Professional Traffic Control Solutions

These high-visibility LED barricade lights are engineered specifically for demanding construction and traffic control environments. Featuring durable, weather-resistant plastic housings and high-intensity LED illumination, they ensure maximum safety and hazard marking in low-light conditions. Designed for versatility, they offer multiple mounting options to easily integrate into existing work zone setups.

Technical Specifications

Light Source	LED
Available Lens Colors	Amber, Red
Housing Material	Durable Plastic

Application & Usage

Recommended Use Cases

- Construction site hazard marking
- Traffic control and management
- Work zone safety
- Roadway delineation

Key Features

High Visibility • Weather Resistant • Versatile Mounting
