

LED Directional Arrow Indicator Light

This LED directional arrow light is designed for automotive applications. Its high-intensity LEDs provide maximum visibility and clear directional indication, enhancing road safety.

Overview

High-Visibility LED Directional Signaling

This LED directional arrow indicator light is engineered for maximum visibility and safety in demanding automotive environments. Featuring high-intensity LEDs and a durable construction, it provides clear directional signaling for construction vehicles and tow trucks. The unit is designed for easy installation, ensuring long-lasting performance and enhanced road safety.

Performance Highlights

1 LEDs

High-Intensity

Technical Specifications

Application Type

Automotive • Construction • Towing

Light Source

High-intensity LEDs

Design & Build

Construction Quality

- Durable construction for long-lasting performance
- High-intensity LED array
- Easy installation design

Application Areas

Recommended Vehicles

Construction Vehicles, Tow Trucks, Emergency Vehicles, Directional Signaling

Safety & Visibility

Safety Impact

Enhances road safety through clear directional indication and maximum visibility.
