

LED Driver 85W 12V 7A

This LED driver provides a DC 12V output at 7A, delivering 85W of power. It is designed for use with LED modules.

Overview

High-Efficiency Slim LED Driver

This ultra-thin LED driver is specifically engineered for space-constrained applications such as furniture and cabinet lighting. With a slim 15mm profile, it integrates seamlessly into compact designs while delivering reliable 85W power. It features high-performance power factor correction and is built to operate safely with LED modules.

Electrical Specifications

Rated Power

85 W

Power Output

Input Voltage	100-240V AC
Output Voltage	12 V
Output Current	7 A
Power Factor	> 0.95
Max Output Voltage	12.4 V

Physical Characteristics

Thickness	15 mm
Design	Ultra-thin / Slim

Operational Environment

Ambient Temperature (Ta)	25 °C
--------------------------	-------

Compliance & Compatibility

Certifications

CE • SELV • RoHS

Recommended Use

LED Modules, Furniture Lighting, Cabinet Lighting
