

LED Emergency Light with Adjustable Heads

This LED emergency light provides illumination during power outages or emergencies. It features two adjustable lamp heads each containing a bright LED light source, and is equipped with a rechargeable battery for autonomous operation.

Product Overview

Reliable Emergency Illumination

This LED emergency light is designed to provide high-brightness illumination during power outages, ensuring safety in critical environments. Featuring adjustable lamp heads and an integrated rechargeable battery, it offers autonomous operation when mains power fails. It is an ideal lighting solution for public spaces, including factories, hotels, and schools, combining energy efficiency with long-lasting performance.

Technical Specifications

Controls & Indicators

- Power switch
- Status indicator light

Key Features

Low Power Consumption, High Brightness, Long Service Life, Adjustable Heads

Mounting Configuration

Wall Mount

Applications

Recommended Use Cases

Factories • Hotels • Schools • Public Buildings
