

LED Emergency Vehicle Headlight

This LED headlight is designed for emergency and security lighting on vehicles. It features four high-intensity LED lights and suction cups for mounting.

Overview

High-Intensity Emergency Lighting

The LTD40 LED headlight is a specialized lighting solution engineered for emergency and security applications. Featuring a compact design with four high-intensity LED modules, this unit provides reliable and effective illumination for critical situations. With its integrated suction cup mounting system, it offers rapid and secure installation on vehicle windshields or other smooth surfaces, ensuring enhanced visibility when and where it is needed most.

Technical Specifications

LED Quantity	4 units
Mounting Method	Suction cup
Primary Applications	Emergency Vehicles, Security Lighting, Enhanced Visibility

Performance Features

Key Performance Attributes

- High-intensity output
- Energy efficient LED technology
- Compact form factor
- Long-lasting operational life
