

LED Emergency Vehicle Lightbar

This LED lightbar provides high-intensity emergency lighting for various applications. It features multiple LED modules in blue, white, and amber/red colors, with selectable flash patterns.

Overview

High-Intensity Emergency Lighting

The LTF8800B LED lightbar is a high-intensity emergency lighting solution designed for various applications requiring clear and attention-grabbing visual signals. Featuring a robust and durable construction, this lightbar incorporates multiple LED modules in blue, white, and amber/red colors, providing versatile signaling options. Its aerodynamic design minimizes wind resistance, ensuring stable performance at high speeds.

Technical Specifications

Available LED Colors	Blue, White, Amber, Red
Flash Patterns	Selectable via external controller

Installation & Design

Design Highlights

- Aerodynamic profile
- Reduced wind resistance
- Robust and durable construction

Installation	Includes mounting hardware
--------------	----------------------------

Applications

Suitable For

Emergency Vehicles • Construction Vehicles
