

LED Flat Panel

This LED flat panel is designed for a variety of lighting applications in both homes and businesses. The slim profile and uniform light distribution make it an energy-efficient lighting solution.

Product Overview

Versatile LED Lighting Solution

This LED flat panel is designed for both indoor and outdoor lighting applications, offering a versatile solution for residential, commercial, and retail environments. Featuring a slim profile, the panel provides uniform illumination and is engineered for energy efficiency and long-lasting performance. The design includes adjustable mounting clips, ensuring a secure and straightforward installation process for various ceiling types.

Available Designs

Square, Round, Slim Profile
