

LED Flood Light for Tower Cranes

High-performance LED lighting solution designed for tower cranes and square project applications. This robust lighting system delivers exceptional brightness, energy efficiency, and long-lasting performance.

Product Overview

High-Performance Industrial Lighting

This robust LED lighting solution is engineered specifically for the demanding requirements of tower cranes and large-scale square project applications. Designed to deliver exceptional brightness and energy efficiency, the system ensures reliable performance in harsh industrial environments. Its durable construction makes it an ideal choice for professional-grade floodlighting and mining light applications.

Technical Specifications

Available Models

- A05-20
- A06-20

Key Features

Adjustable Color Temperature • Wide Input Voltage • Durable Construction • High Efficiency

Primary Applications

Tower Cranes, Square Projects, Industrial Lighting, Mining
