Overview

High-Efficiency LED Flood Lighting

This LED flood light features a durable aluminum die-casting housing designed for effective heat dissipation, significantly extending the fixture's lifespan. Engineered for high performance, it delivers an impressive light efficiency of 120lm/w. With a robust design suitable for demanding environments, it is an ideal solution for outdoor areas, warehouses, factories, and stadiums.

Technical Specifications

Light Efficiency

120 lm/w
Light Efficiency

IP Rating

IP65

Rated Lifespan

50000 hours

Beam Angle

110°

Construction & Design

Housing Material

Aluminum die-casting

Cooling System

Integrated driving and radiator design

Applications

Suitable Environments

Outdoor, Warehouse, Factory, Stadium, Security Lighting, Landscape Lighting
