Overview

High-Performance LED Flood Lighting

These professional-grade LED flood lights are engineered for versatile outdoor illumination, including architectural, landscape, and general area lighting. Featuring robust aluminum construction and an IP65 weather-resistance rating, these fixtures are built for durability and long-term reliability. Advanced features such as DMX512 control, high-efficiency thermal management, and a wide range of beam angles ensure precise control and exceptional performance for any project requirement.

Technical Specifications

Ingress Protection Rating

IP65

Input Voltage

AC85-265V

Color Rendering Index (CRI)

80 Ra

Color Temperature

3000K - 6500K

Available Beam Angles

15°, 30°, 45°, 60°

Housing Material

Aluminum

Control System

DMX512 (16.7 million color variations)

Performance Metrics

Luminous Efficiency

96 %

Light Transmittance

Model Configurations

Available Power Configurations

Power (W)	Dimensions (mm)
150	420 × 320 × 200
200	420 × 320 × 200
250	420 × 320 × 200
300	580 × 320 × 200
400	580 × 320 × 200
500	670 × 320 × 213
600	800 × 325 × 213
