Overview

Professional LED Floodlighting Solution

This versatile LED floodlight series is engineered for enduring, cost-effective performance across a wide range of indoor and outdoor applications. Featuring a robust design with an adjustable gear-bracket for stability and an external respirator to prevent fogging, it ensures reliability in various environments. With high luminous efficiency of 150lm/w and multiple optical distribution options, this series provides an energy-saving solution for professional lighting needs.

Technical Specifications

Surge Protection	5KV
Available Optics	10°, 25°, 60°, Asymmetrical, Symmetrical
Warranty Period	5 years

Features

Core Features

Isolated Drive • Built-in Junction Box • External Respirator • Stable Gear-Bracket • Private Tooling

Optional Components

- LUMILEDS brand chips
- Meanwell isolated driver
- Portable stand
