Product Overview

High-Efficiency UFO LED High Bay

This LED High Bay light features a modern, compact UFO design that significantly reduces size compared to traditional lighting fixtures. Engineered for durability and performance, it utilizes an advanced cooling structure to ensure a long operational lifespan and consistent quality. It serves as an ideal energy-saving replacement for HPS or MH lamps, reducing electricity consumption by over 50% while minimizing maintenance needs.

Performance & Efficiency

Maintenance

Maintenance Free • Reduced Re-lamp Frequency

Energy Savings

Over 50% reduction in electricity bills compared to HPS/MH

Design & Construction

Design Style

Fashion UFO Design

Cooling System

Efficient integrated heat sink for thermal management

Mounting Hardware

Metal bracket included

Applications

Suitable Environments

- Warehouses
- Factories
- Gymnasiums
- Large indoor spaces
