

# LED Lens Panel Light

This LED lens panel light features a high-end PMA optical lens for superior light distribution. The lamp's disc adopts a high reflection matte surface treatment and PS light diffusion sheet, providing high luminous efficiency and a comfortable visual experience.

## Product Overview

### High-Efficiency LED Lens Panel Light

This LED lens panel light features a high-end PMA optical lens and a high-reflection matte surface for superior light distribution. Designed for both commercial and residential environments, it offers a soft, glare-free illumination while maintaining high energy efficiency. The unit supports wide voltage operation and constant current output, ensuring a flicker-free, noise-free, and stable lighting experience.

## Performance Metrics

### Energy Efficiency

**80 %**

Energy Savings

## Technical Specifications

### Electrical Characteristics

- Wide voltage operation
- Constant output current
- No ripple or strobe
- No noise or interference

### Optical Features

High reflection matte surface, PS light diffused sheet, Uniform light distribution, Glare-free

## Applications

### Recommended Environments

Household • Exhibition Hall • Hotel • Shops • Jewelry Store • Offices • Schools • Museums
