Product Overview

Professional LED Aluminum Extrusion

This high-quality aluminum profile is engineered specifically for LED lighting applications, providing both structural support and superior heat dissipation. Designed for durability and aesthetics, it protects LED strips from dust and damage while ensuring a clean, professional finish. Its versatile design makes it an ideal choice for custom linear lighting solutions in residential, commercial, and industrial environments.

Technical Features

Heat Management	Yes
Mounting Versatility	Surface-mounted, Recessed
Material	Durable Aluminum Alloy

Applications

Recommended Environments

- Residential Lighting
- Commercial Lighting
- Industrial Lighting
- Architectural Lighting

Key Advantages

Easy Installation • Dust Protection • Professional Aesthetic
