

# LED Light Bulb with Clear Flat Lens

This LED light bulb features a clear, round, flat lens covering multiple individual LED emitters. It has a standard screw base for easy installation into compatible fixtures and is designed for energy efficiency and long life.

## Product Overview

### High-Efficiency LED Illumination

This JDR LED light bulb is engineered for superior energy efficiency and long-lasting performance in professional lighting environments. Featuring a specialized clear, flat lens, the design ensures maximum light output and optimal distribution across the target area. Its standard screw base allows for seamless integration into existing fixtures, making it a reliable solution for various commercial and industrial applications.

## Technical Specifications

Lens Design	Clear, round, flat lens
Base Type	Standard screw base
Light Source	Multi-emitter LED array

## Features

### Key Benefits

- Energy efficient design
- Extended service life
- Optimized light distribution
- Easy installation
