

LED Lighting for Civil Applications

High-efficiency LED lighting solution designed for civil applications. Features a robust heat sink and standard screw base for easy installation.

Product Overview

High-Efficiency Civil LED Lighting

This high-efficiency LED lighting solution is engineered specifically for civil applications, offering a robust and reliable illumination source. Featuring an advanced heat sink design, the product ensures optimal thermal management, which significantly extends the operational lifespan of the unit. Designed for versatility, it comes equipped with a standard screw base, allowing for seamless integration and easy installation into existing fixtures for both residential and commercial environments.

Technical Specifications

Installation Base	Standard screw base
Thermal Design	Robust heat sink for optimal heat dissipation
Recommended Applications	Residential, Commercial, Civil Infrastructure
