

LED Linear High Bay Light

This LED linear high bay light is designed for industrial and commercial use. Its aluminum housing includes an integrated heat sink for thermal management, ensuring efficient lighting in warehouses, factories, and supermarkets.

Product Overview

High-Performance Industrial Lighting

This LED linear high bay light is engineered for demanding industrial and commercial environments, including warehouses, factories, and supermarkets. Featuring a durable aluminum housing with an integrated heat sink, it ensures optimal thermal management for consistent reliability. The design delivers uniform, energy-efficient illumination while offering low maintenance and easy installation for long-term operational savings.

Technical Specifications

Housing Material	Aluminum
Thermal Management	Integrated Heat Sink

Applications

Suitable Environments	Warehouses, Factories, Supermarkets, Large Indoor Spaces
-----------------------	--

Key Features

Key Benefits

- Energy-efficient illumination
- Durable aluminum construction
- Easy installation process
- Low maintenance requirements
