

LED Miniature Bulb for Automotive Lighting

This LED miniature bulb is designed for automotive lighting applications. It provides enhanced brightness and uniform light distribution due to its multiple LEDs.

Product Overview

High-Intensity Automotive LED Solution

This LED miniature bulb is engineered for superior automotive lighting performance, featuring multiple LEDs that ensure enhanced brightness and uniform light distribution. Designed for both interior and exterior applications, it serves as an efficient, long-lasting replacement for standard incandescent bulbs. Its durable, clear plastic housing provides robust protection, making it an ideal choice for dome lights, map lights, and signal lighting.

Technical Specifications

Light Source	LED
Housing Material	Clear Durable Plastic
Socket Compatibility	Standard miniature bulb sockets

Performance Features

Typical Applications

- Interior Dome Lights
- Map Lights
- Vehicle Signal Lights

Key Advantages

Low Power Consumption, Long Lifespan, Enhanced Brightness, Uniform Light Distribution
