Product Overview

High-Performance Outdoor Lighting

The G4 Terra LED flood light is a high-performance outdoor lighting solution designed for security and general illumination. It features energy-efficient LED technology, providing bright and uniform light output while minimizing power consumption. Equipped with an integrated motion sensor, it automatically activates upon detecting movement, enhancing both security and convenience for various outdoor environments.

Technical Specifications

Housing Material	Robust punching press die-cast aluminum
Light Transmittance	98 %
Mounting Versatility	Wall Mounting, Ground Mounting, Ceiling Mounting

Features

Key Features

- Integrated motion sensor for automated activation
- Water-proof and handy connectors
- High light transmittance optical lens
- Weather-resistant construction

Applications

Recommended Applications

Stadium • Arena • Hotel • Wall • Plant • Gardens • Pathways
