

# LED PAR20 Reflector Bulb

The LED PAR20 reflector bulb is designed for directional lighting applications and features an E26/E27 base, making it compatible with standard household fixtures. Its PAR20 form factor ensures focused light output, making it suitable for accent, track, and recessed lighting.

## Overview

### High-Efficiency Directional Lighting

The LED PAR20 reflector bulb is a high-efficiency lighting solution engineered for precision directional applications. Designed with a standard E26/E27 base, it offers seamless compatibility with existing track, accent, and recessed lighting fixtures. This bulb utilizes advanced LED technology to deliver significant energy savings and a long operational lifespan, making it an ideal choice for professional lighting upgrades.

## Technical Specifications

Bulb Type	LED Reflector
Form Factor	PAR20
Base Type	E26, E27

## Performance Features

### Key Benefits

- Energy efficient LED technology
- Instant-on capability
- Long lifespan
- Reduced maintenance costs

### Recommended Applications

Accent Lighting • Track Lighting • Recessed Lighting
