

LED Plastic Recessed Downlight

This LED downlight is made with durable plastic. Its integrated LED light source provides energy-efficient illumination, reducing power consumption and maintenance costs.

Product Overview

High-Efficiency LED Downlight

This LED recessed downlight features a durable plastic construction designed for longevity and resistance to wear. Its integrated LED light source provides energy-efficient illumination, significantly reducing power consumption and long-term maintenance costs. The fixture is engineered for easy installation using spring clips, making it a versatile choice for a wide variety of ceiling types in both residential and commercial settings.

Technical Specifications

Housing Material	Durable Plastic
Installation Type	Recessed with spring clips
Finish	White

Key Features

Core Advantages

- Energy-efficient LED technology
- Wear-resistant construction
- Low maintenance requirements
- Easy spring-clip installation
- Modern aesthetic design

Application

Suitable Environments	Residential, Commercial, Indoor Lighting
