Product Overview

Contemporary Area Lighting Solution

This sleek, contemporary post top fixture is engineered for efficient outdoor area lighting. Constructed with durable die-cast aluminum, it offers a clean aesthetic and simplified installation for retrofitting onto standard 2-3/8 inch tenons. Designed to replace traditional 250-watt metal halide fixtures, this unit provides high-lumen output and uniform illumination for pathways, parking lots, and streetscapes.

Performance Metrics

Lumen Output

8760 lm

Lumen Output

Replaces Metal Halide

250 W
