

LED Recessed Downlight Fixture

This recessed LED downlight fixture is designed for indoor lighting. Its circular design includes a reflector to enhance light output, and it comes with mounting brackets for easy installation.

Product Overview

Versatile LED Downlight Solution

This LED recessed downlight fixture is engineered for high-performance indoor lighting in both residential and commercial environments. Its circular design incorporates a specialized reflector to maximize light output and efficiency. Featuring integrated mounting brackets, the unit is designed for a streamlined, secure installation in various ceiling types.

Technical Specifications

Lighting Technology	LED
Mounting Style	Recessed
Shape	Circular

Key Features

Performance Advantages

- Energy efficient LED technology
- Extended operational lifespan
- Enhanced output via built-in reflector
- Integrated brackets for easy installation

Primary Applications	Residential, Commercial, Indoor Lighting
