Product Overview

Intelligent Retrofit Lighting

This LED retrofit module provides an intelligent lighting solution for existing ceiling fixtures, featuring a built-in microwave motion sensor for automated energy management. Designed for easy installation, it utilizes magnetic mounting to upgrade standard lamps into motion-activated systems. The module is suitable for a wide range of residential and commercial environments, offering reliable performance and automatic operation.

Sensor Technology

Operating Modes

Mode	Function
Type A	ON/OFF (100% brightness on detection, 0% when idle)
Type B	Full/Dim (100% brightness on detection, 20% standby when idle)

Delay Time	20 seconds
Daylight Threshold	< 10 lux (Optional)

Technical Specifications

Warranty	2 years
Quality Control	Sensor function test, Aging test

Applications

Domestic Applications

- Corridor
- Cabinets
- Hallway
- Stairways
- Attics
- Basement
- Warehouse
- Closet
- Depot
- Bathroom
- Toilet
- Children Room

Business Applications

- Shops
- Offices
- Warehouses
- Storerooms
- Workshops
- Cable ways
- Substations
- Archives
