

LED Rotating Warning Beacon

This LED rotating beacon provides a clear visual warning signal. It is designed for use in mining, industrial, and traffic safety applications.

ADDITIONAL IMAGES

Product Overview

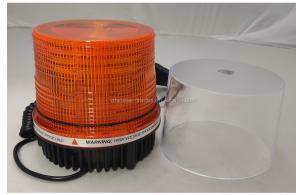

High-intensity LED rotating beacon with a durable base, suitable for hazardous environment safety signaling.

High-Visibility Industrial Beacon

This high-intensity LED rotating warning beacon is engineered for demanding industrial and mining environments. It features a durable, weather-resistant design with a PC lens and robust base, ensuring 360-degree visibility. With its multi-function flashing capabilities and wide voltage compatibility, it provides a reliable safety signal for hazardous areas.

Technical Specifications

Rotating beacon featuring a bright orange lens and integrated cooling fins for reliable performance.

Waterproof Rating

IP65

Light Source

LED

Working Voltage

DC 12/24V

Flash Function

Three function flashing / Double flash

Design & Materials

Alternating red and blue LED configuration for high-visibility hazard alerting.

Diverse mounting options and color configurations available for different industrial applications.

Material Composition

PC lens + Rubber/ABS base

Available Colors

Amber, Blue, Orange, Red, Two Color

Logistics & Warranty

Warranty

12 months

Minimum Order Quantity

200 pcs

Packaging

20 PCS/CTN
