

# LED Rotating Warning Light

This LED rotating warning light provides a bright, attention-grabbing signal for safety and visibility. It is designed for automotive and industrial applications, offering reliable performance in demanding environments.

## Product Overview

Wide range of industrial and automotive warning light designs.

**Professional LED Warning Solution**  
 This LED rotating warning light offers high-visibility signaling for automotive and industrial safety applications. Engineered with a durable PC lens and robust ABS base, it features an IP65 rating to withstand demanding weather conditions. The light utilizes 40 high-intensity 5730 LED chips with three distinct flashing modes to ensure maximum alertness in low-light or emergency environments.

## Technical Specifications

<b>Waterproof Rating</b>	
IP65	
<b>Working Voltage</b>	12-24V DC
<b>LED Configuration</b>	40 chips
<b>Flashing Modes</b>	Three function flashing

## Physical Characteristics

Versatile warning light models suitable for diverse vehicle and site safety needs.

### Construction Materials

- Polycarbonate (PC) Lens
- Acrylonitrile Butadiene Styrene (ABS) Base

### Installation

Magnetic mount with cigarette lighter plug

### Available Colors

Amber, Blue, Orange, Red

## Commercial Terms

### Minimum Order Quantity

200 pcs

### Warranty Period

12 Months

### Standard Packaging

20 PCS per carton
