

LED Snowfall Effect Tube Light

This LED snowfall tube light simulates a falling snow effect with sequential LED illumination. It features a clear, durable tube, LEDs mounted on a circuit board, and a standard E27 screw base for AC230V power input.

Overview

Decorative LED Snowfall Lighting

This LED snowfall effect tube light is designed to create a captivating, sequential falling snow visual effect. Encased in a durable, clear tube, it is engineered for decorative lighting applications where ambiance is a priority. With its standard E27 base and AC230V compatibility, it offers a straightforward, energy-efficient lighting solution for professional decorative projects.

Technical Specifications

Base Type	E27 Screw Base
Input Voltage	230 V
Power Source	AC
Model Identifier	VGC-D50-E27-3520-2300

Features

Lighting Effect	Sequential Snowfall • Decorative
Efficiency	Yes

Certification

Compliance Marks	CE
