

LED Sports Venue Flood Light

This LED sports light features aerometal materials and vented heat sinks for improved thermal management and system stability. The die-cast radiator provides thermal conductivity for energy conservation, a long service life, and environmental protection.

Product Overview

Professional Sports Venue Lighting

This high-performance LED flood light is engineered for demanding sports venue applications where lightweight design and high efficacy are critical. Featuring a modular construction and robust corrosion-resistant coating, it offers a reliable, energy-efficient solution for stadiums, arenas, and high-mast lighting. With advanced thermal management and multiple beam angle options, it ensures consistent illumination and long-term stability for diverse sporting environments.

Performance Metrics

Power Range

300 W

Minimum Power

1250 W

Maximum Power

Luminous Efficacy

150 Lm/w

Technical Specifications

IP Rating

IP66

Warranty

5 years

Certifications

CE, RoHS, DLC, FCC, UL

Design & Construction

Key Features

- Modular design for simple maintenance
- Convenient assembly and disassembly
- High-strength structure
- Corrosion-resistant polyester powder coating
- Advanced thermal management system
- Die-cast radiator for heat dissipation

Application & Versatility

Suitable Environments

Stadiums • Sports Fields • High Mast Lighting • Light Towers • Ports
