

LED Stone Paver for Outdoor Lighting

These LED stone pavers are designed for integration into outdoor areas such as walkways and patios. Encased in protective frames, they provide both decorative and functional lighting.

Product Overview

Professional Outdoor LED Integration

These rectangular LED stone pavers are engineered for seamless integration into outdoor walkways, patios, and landscaping projects. Designed with a durable, translucent material for consistent light diffusion, each unit is securely encased in a protective wooden frame for enhanced structural stability during installation. They serve as an ideal solution for professionals seeking to combine decorative aesthetics with functional path lighting for commercial and high-end residential outdoor spaces.
