

LED Street Light for Roadway Illumination

This LED street light is designed for illuminating roadways, parking lots, and pathways. Its durable, weather-resistant housing ensures long-lasting performance and bright, uniform light distribution with minimized energy consumption.

Product Overview

High-Efficiency Roadway Illumination

This LED street light is engineered for superior performance in roadway, parking lot, and pathway illumination. Its durable, weather-resistant housing ensures long-lasting operation in diverse outdoor environments. By providing bright and uniform light distribution, it effectively enhances visibility while significantly minimizing energy consumption for municipal and commercial applications.

Key Features

Performance Highlights

1 High

Energy Efficiency

1 Certified

Weather Resistance

Ideal Applications

Roadways, Parking Lots, Pathways, Municipal Lighting, Commercial Lighting
