Product Overview

Halo Series LED Street Lighting

The Halo Series LED street light is an engineered solution designed for high-performance outdoor illumination across diverse environments. Featuring an aerodynamic, arc-shaped cooling design, it ensures effective heat dissipation and dust removal for long-term reliability. Built from robust pressure die-cast aluminum with a durable polyester powder coat finish, this unit is ideal for public roads, industrial zones, and civic areas.

Technical Specifications

Impact Resistance

IK08

Maintenance Features

- Non-slip open bracket for easy maintenance
- Power-off protection socket

Housing Material

Pressure die-cast aluminum with polyester powder coat finish

Optical System

Combined optical lens with versatile configuration options for various road lighting requirements

Applications

Suitable Applications

Public Roads, Footpaths, Cycleways, Carparks, Marinas, Industrial Areas, Civic Areas
