

LED Street Light Housing

This robust housing is designed for LED street lights. It features heat dissipation fins, a metallic mounting bracket, and a secure latching mechanism.

Product Overview

Robust LED Street Light Housing

This high-quality housing is specifically engineered for LED street lighting applications, designed to withstand harsh outdoor environments. It features an integrated metallic mounting bracket for secure installation and advanced heat dissipation fins to ensure optimal thermal management for long-lasting reliability. The design includes a convenient power connector recess and a secure latching mechanism, making it a dependable choice for durable lighting infrastructure.

Design & Construction

Key Design Features

- Metallic mounting bracket
- Corrosion-resistant grey finish
- Integrated heat dissipation fins
- Power connector recess
- Secure latching mechanism

Application Environment

Outdoor, Street Lighting, Harsh Environments
