

LED Street Light with Integrated Heat Dissipation

This LED street light features integrated driving and radiator design for effective heat diffusion, which extends its operational lifespan. It is designed for street, parking lot, and area lighting applications.

Product Overview

High-Performance Outdoor Illumination

This LED street light features a durable aluminum die-casting housing with outdoor acid spray painting, ensuring long-term resilience in various environments. By integrating the driver and radiator into a single design, the fixture achieves superior heat dissipation, which significantly extends its operational lifespan. It is an ideal solution for roads, warehouses, factories, stadiums, and other large-scale outdoor areas.

Performance Metrics

Light Efficiency

130 lm/w

Light Efficiency

Lifespan

50000 hours

Rated Life

Technical Specifications

Adjustment Angle	-5° to 5°
Housing Material	Aluminum die-casting

Features

Smart Control Compatibility	Yes
Supported Systems	NB-IOT

Applications

Suitable Environments

- Roads
- Outdoors
- Warehouses
- Factories
- Stadiums
