

LED Surface Mount Downlight

This LED downlight is designed for surface mounting. It features quick charge, a night function, and a microwave sensor.

Product Overview

Efficient Surface Mounted Lighting

This surface-mounted LED downlight is engineered for modern lighting requirements, offering a versatile solution for various indoor environments. It features advanced functionality including quick charge capabilities, a built-in night function, and an integrated microwave sensor for automated operation. Designed for convenience and energy efficiency, this fixture provides reliable illumination while simplifying installation and control.
