

LED T-Shape Light Bulb with Motion Sensor

This LED T-shape bulb is designed for emergency and security lighting applications. It features a built-in microwave sensor for motion detection and quick charge capability.

Product Overview

High-Performance T-Shape LED

This high-performance LED T-shape bulb is engineered specifically for emergency and security lighting applications. It integrates advanced microwave sensor technology for reliable motion detection and features quick-charge capabilities to ensure readiness. Designed for efficiency, this bulb offers low energy consumption while maintaining high illumination standards, making it an ideal choice for residential, commercial, and industrial environments.

Key Features

Core Capabilities	Motion Sensor, Emergency Lighting, Security Lighting, Quick Charge
Sensor Technology	Microwave

Performance Metrics

Performance Highlights

1 High Energy Efficiency	1 Industrial Grade Reliability
