

LED T8 Replacement Tube

This LED T8 tube is an energy-efficient replacement for traditional fluorescent tubes. It is designed for long life and reduced energy consumption compared to conventional lighting solutions, making it suitable for various lighting applications.

Product Overview

Energy-Efficient Lighting Solution

This LED T8 replacement tube is engineered as a direct, energy-efficient upgrade for traditional fluorescent lighting systems. Featuring a clear cylindrical housing with precisely spaced LED emitters, it ensures uniform light distribution across various commercial and industrial environments. Designed for longevity and reduced energy consumption, this tube offers a reliable, high-performance alternative to conventional lighting.

Technical Specifications

Form Factor	T8 Tube
Housing Style	Clear cylindrical
Connector Type	Metallic end caps

Key Benefits

Key Advantages

- Energy-efficient operation
- Extended service life
- Direct replacement for fluorescent tubes
- Uniform light distribution
