

LED Tail Light

This tail light features multiple LEDs for turn signal, brake light, and tail light functions. It has a durable housing and energy-efficient LED technology for long-lasting performance and enhanced visibility.

Product Overview

Universal LED Rear Combination Lamp

This three-chamber LED tail lamp is designed as a versatile, universal lighting solution for various commercial vehicles, including trailers and trucks. Utilizing efficient LED technology, this unit provides reliable performance for essential functions such as turn signals, brake lights, and standard tail light illumination. Its durable housing ensures longevity, offering enhanced visibility and safety on the road.

Technical Specifications

Integrated Functions

- Turn Signal
- Brake Light
- Tail Light
