

# LED Tail Lights with Car Spoiler

These LED tail lights offer increased brightness and longevity compared to traditional bulbs. The car spoiler is designed to improve aerodynamics and give vehicles a sporty look, with potential integrated lamp functionality.

## ADDITIONAL IMAGES

## Product Overview

### Integrated Aerodynamic Lighting

This refitted LED taillight and spoiler combination is designed to elevate both the aesthetics and safety of your vehicle. Featuring high-intensity LED technology, these lights offer superior brightness and longevity compared to standard lighting solutions. The integrated spoiler design focuses on improving aerodynamics while providing a modern, sporty appearance through its 3D stereoscopic styling.

## Compatibility

### Compatible Models

10th Generation Civic (2016-2019)

## Technical Specifications

### Design & Finish

- 3D stereoscopic design
- Hidden-style lamp body
- 4S original factory 1:1 paint finish

### Installation

Professional installation is highly recommended to ensure optimal fitment and electrical function.
