

LED Tower Light Flood Light

This LED tower light features a 6063 aluminum shell for durability and efficient heat dissipation. It provides high output and a long 50,000-hour rated average life, making it suitable for demanding industrial environments.

Overview

High-Performance Industrial Flood Lighting

This industrial-grade LED tower flood light is engineered for superior thermal management and durability, utilizing a high-quality aluminum shell construction. Designed to replace traditional 1000W metal halide lamps, it offers an efficient 350W power output with a high light efficacy of 150Lm/W. Its versatile design supports a wide range of input voltages and specialized lens angles, making it an ideal choice for construction sites, warehouses, and demanding outdoor environments.

Technical Specifications

Power Consumption

350 W

Rated Power

Available Beam Angles

- 40°
- 60°
- 90°
- 60° x 40° (Special Tower Light Lens)

Luminous Efficacy	150 Lm/W
Input Voltage Options	AC100-277V, DC24V, DC48V
Average Lifespan	50000 hours

Physical Properties

IP Rating

IP66

Weight

9.7 kg

Housing Material

6063 Aluminum

Components

Core Components

Component	Type/Brand
LED Chips	Lumileds or Cree
Driver	MW or Sosen
