Product Overview

Advanced LED Traffic Signal Systems

These modern LED traffic signal lights are engineered for high-efficiency traffic management, providing reliable performance in urban and suburban intersections. Featuring bright, energy-saving LED technology, the units ensure excellent visibility across varying weather conditions. The robust construction allows for long-lasting operation in outdoor environments, significantly improving road capacity and safety.

Configuration Options

Model Series

- XHG001
- XHG002
- XHG007
- XHG008
- XHG009
- YT008
- YT009
- YT010
- YT011
- YT012
- YT013

Signal Variations

Red/Yellow/Green Circular, Pedestrian Signal, Countdown Timers, Directional Arrows

Operational Features

Performance Benefits

- Energy-saving LED light sources
- High visibility in all weather
- Integrated countdown displays
- Durable, weather-resistant outdoor housing
