

LED Tube Light

This LED tube light is an energy-efficient replacement for traditional fluorescent tubes. Its durable construction and diffused cover ensure uniform light distribution and reduced maintenance.

Product Overview

Energy-Efficient Lighting Solution

This LED tube light serves as a high-performance, energy-efficient replacement for traditional fluorescent lighting. Designed with a white, diffused cover, it ensures uniform light distribution across any space. Its durable construction is engineered for long-lasting reliability, significantly reducing maintenance costs in both commercial and residential environments.

Technical Specifications

Installation	Two-pin connector
Light Distribution	Uniform diffused
Applications	Commercial, Residential

Key Features

Key Benefits

- Energy-efficient design
- Reduced maintenance costs
- Durable construction
- Uniform light output
