

LED Tube Light with White Diffuser

This LED tube light is designed to replace traditional fluorescent tubes. Its white diffuser ensures even light distribution, and it is suitable for various lighting applications.

Product Overview

High-Efficiency LED Tube Light

This LED tube light is designed as a direct, energy-efficient replacement for traditional fluorescent tubes. It features a high-quality white diffuser that ensures even light distribution, eliminating harsh glare and hotspots. Engineered for longevity and ease of use, it includes standard connector pins for seamless installation into compatible lighting fixtures.

Technical Specifications

Light Source	LED
Diffuser Material	White Diffuser

Installation & Compatibility

Installation	Compatible with standard fluorescent fixtures
Connector Type	Standard connector pins

Features

Key Benefits

- Energy-efficient operation
- Long-lasting lifespan
- Even light distribution
- Easy installation
