

LED Tunnel Light

High-performance LED tunnel lamp provides optimal illumination for enclosed environments. It features a robust aluminum alloy housing with integrated heat sink for efficient thermal management.

Product Overview

Professional Tunnel Illumination

This high-performance LED tunnel light is engineered specifically for optimal visibility in enclosed environments such as tunnels and underpasses. It features a robust aluminum alloy housing with an integrated heat sink to ensure reliable thermal management and longevity. The system utilizes high-output LEDs to deliver superior brightness while maintaining excellent energy efficiency for demanding infrastructure projects.

Technical Specifications

Housing Material	Aluminum alloy
Thermal Cooling	Integrated heat sink

Installation

Mounting Bracket	Adjustable
------------------	------------

Applications

Recommended Use	Tunnels, Underpasses, Confined Spaces, Infrastructure
